

# East Side Cemetery Interactive Map User Guide

## Welcome to the City of Dodgeville GIS Interactive Map!

If you have any questions, comments, concerns, or edits, please email us at [eastsidecemetery@swwrpc.org](mailto:eastsidecemetery@swwrpc.org).

### Page Layout

When you first launch the interactive map, you will see many different objects on the screen. There is map space, points with burial records, a row of tools at the top left hand corner, and a scrolling box on the right that changes based on the tool you select. All of these aspects play different roles in showing you information you want to know.

### Buttons for Use

Default Extent 

By clicking this button, you zoom to the original extent.

Legend 

Explains the various symbols in the map.

Layers 

Allows the user to click map layers off-and-on for different navigation.

Graves

Civilians

Veterans

Veterans

Owned/Not Occupied

Unowned Spaces

Cemetery Sections, Blocks, Lots

Basemap Gallery 

Allows the user to change the map from aerial imagery to additional maps.

Details 

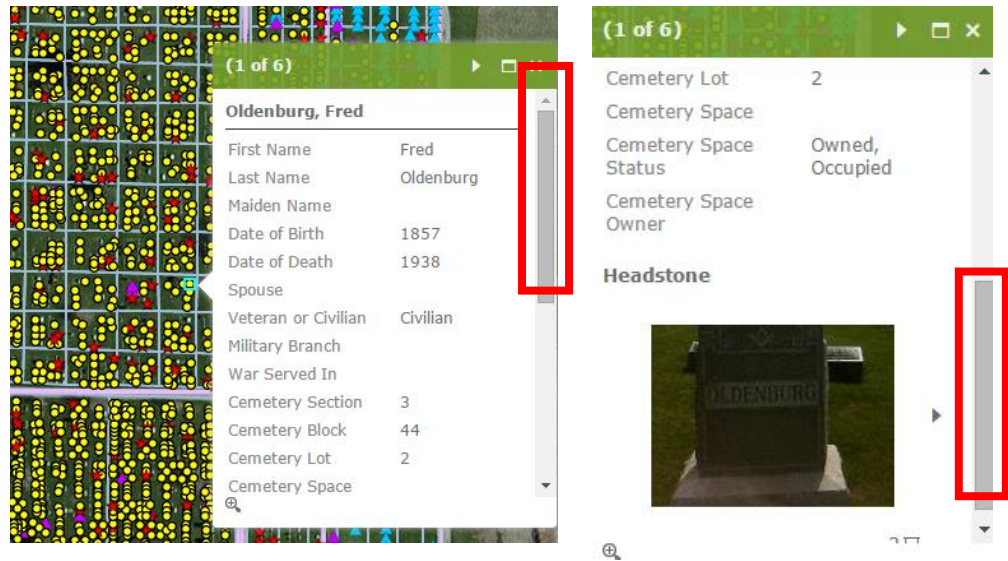

Cemetery ownership and location information.

Search Box 

Allows users to search/query for burial records by Last Name, First Name. There are two searchable layers: 1) burial records of deceased individuals, and 2) records of purchased plots (Owned/Not Occupied).

## Identify Points

The map allows you to click any of the points to identify burial information in the pop-up window, and view the headstone and obituary, if available. You can click the obituary photo open another window to see a larger obituary image. To view more information and the headstone or obituary photo, you must use the scroll bar (highlighted in red).

## Burial Information

The following information is presented, if available and applicable for each burial:

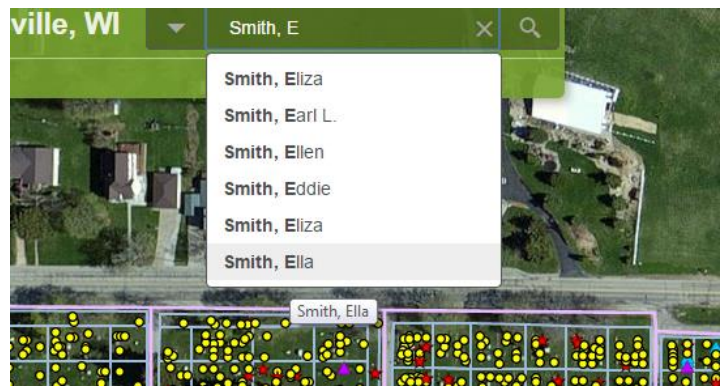

- First Name
- Last Name
- Maiden Name
- Date of Birth
- Date of Death
- Spouse
- Veteran or Civilian
- Military Branch
- War Served In
- Cemetery Section
- Cemetery Block
- Cemetery Lot
- Cemetery Space
- Cemetery Space Status (Owned/Occupied, Purchased, Available)
- Cemetery Space Owner
- Headstone (photo)
- Obituary (photo)

## Search/Query

### Burial (Graves) Records Search

In this interactive map, certain layers are linked to external databases, and queries are a way of culling data from those databases. Users can search for burial records (graves) or for purchased plots (Owned/Not Occupied) by owner.

Searching for individuals can be accomplished by entering the “last name, first name” into the search box. Please make sure you have the Grave layer turned on (check marked) to allow the search feature to work. **Due to amount of burials with the same last name, please enter both the last name and first name in this format “last name, first name”.** \*Entering only the last name will not populate the full list because the list is limited to showing only six names.

### Purchased Plots (Owned/Not Occupied) Search

In addition, users can search for purchased plots (Owned/Not Occupied) by **owner**. Users need to **click** the drop down arrow to change the search selection from graves to purchased (Owned/Not Occupied) plots. Searching for owners can be accomplished by entering the “last name, first name” into the search box. Please make sure you have the Owned/Not Occupied layer turned on (check marked) to allow the search feature to work.

### Printing Capabilities

Printing a map can be accomplished by using your computers “Print Screen” button or the snipping tool on your home computer. Make sure you have the online map in the right position on the page, push your “Print Screen” to capture the image, then paste the image into a Word document. If you use the snipping tool: click new, select your area of interest, then you can save the image to your desired file location or copy and paste into a Word document.

## Preferred Browsers

Mozilla Firefox

Google Chrome

## Cemetery Sections, Blocks, Lots, and Spaces

The East Side Cemetery is divided into Sections, Blocks, Lots, and Spaces.

There are 8 sections numbered 1 – 8.

Each section has blocks numbered 1, 2, 3, and so on, except for section 4, which is labeled A – D.

This reference map is useful because each burial information pop-up provides the section block, lot, and space. Use the reference map to find the correct section and block within the cemetery.
